

Greetings Camp Families!

For Summer 2022, we will still be taking measures to ensure everyone arrives to 4-H Camp healthy so we can enjoy a care-free week in the woods together. Since last season's on-site mitigation (podding, etc....) won't be deployed this summer, these entrance protocols are crucial to keeping our Camp community safe and running this summer.

Arrive Healthy: The most important element to keeping 4-H Camp safe and healthy this summer is you! If your camper is feeling sick or displaying symptoms of COVID-19, please stay home! COVID-19 related refunds will be able to be arranged through the Camp Office. If your camper has a close contact with a confirmed COVID-19 case in advance of 4-H Camp, please make us aware and take extra testing precautions. Please continue to follow all relevant state and CDC guidance.

If You Camper is Vaccinated Against Covid-19:

Please upload proof of vaccination to your account in advance of Camp, or bring a copy to check-in, or upload it in advance on your camp account. (When you [log into your registration account](#), there will be an option in the bottom left to upload your vaccination card.)

Because of our close communal environment (and the ubiquity of breakthrough COVID cases), we are going to request that our **vaccinated campers** have a rapid COVID test BEFORE they arrive at 4-H Camp.

For express check-in, we ask that you take a rapid test within 24 hours of camp and present proof at check-in. This can be an at-home or lab processed test. (If you would prefer a PCR test, you can get one of those within a 72-hour window as well.) **A time-stamped photo of your camper's test will suffice as proof for entry.**

If you do not arrive with proof of your own negative test, we will be able to administer one at check-in; *however*, that will significantly add to your check-in time here at 4-H Camp.

If You Camper is Not Vaccinated Against Covid-19:

In accordance with Rutgers University policy, all campers who are unvaccinated against COVID-19 must show proof of a negative PCR test taken within 72 hours of the start of the summer camp session.
